Innovative Surface Solutions Opens a 48 M gallons Terminal in Glenmont, New York

GLENMONT, NY (November 1, 2010) Surface Solutions leased the old Texaco Facility off River Road; a property that had remained abandoned for the last 30 years. They have transformed the property into a clean and efficient storage and warehousing facility guaranteeing supply to the local community while injecting much needed dollars into the economy. This once vacant overgrown field is now home to the largest snow & ice terminal in Northeastern USA and boasts the most advanced load-out system in the industry.

Greg Baun, owner of Innovative Surface Solutions, states: "This beautiful country can be hit with all sorts of weather systems and in order to keep roads safe you need local access to a supply of the latest products & technologies that can tackle every situation. The last 20 years of my life have been dedicated to developing and supplying the safest road maintenance solutions possible. It is with great pride that I can now open our Glenmont Terminal; a state of the art facility that will ensure that this community and countless others are supplied with the safest road maintenance solutions possible – You can truly be Ready When Nature Strikes. Guaranteed."

About Innovative Surface Solutions

Since 1986 Innovative Surface Solutions has been a leader in providing innovative road maintenance and safety solutions that go beyond the required regulations of the industry. They started off with their time proven high performance pothole patching material called ProPatch and in 1995, were the first company to introduce liquid de-icing technology. During that time one of their engineers discovered the synergistic relationship of magnesium chloride and carbohydrates and in collaboration with strategic partners was instrumental in acquiring the coveted Design for the Environment designation from the Federal EPA for the Magic Salt line in 2008. Since then their product line-up has grown to include liquid and packaged magnesium and calcium chlorides, blended or treated de-icers for winter anti-icing, de-icing and pre-wetting; liquid and packaged summer dust control products and all year pothole patching materials.
