

INNOVATIVE ASPHALT REPAIR

Innovative Asphalt Base Sealer is a superior grade of asphalt cutback ideally suited for all residential and industrial paved surfaces.

- **Innovative Asphalt Base Sealer** retains high expansion and contracting, even at low temperatures, thus eliminating the "checking" or "alligator cracking" associated with other types of sealers as it contains special oils that actually help rejuvenate pavement surfaces
- Specifically designed for the pavement Contractor and is **not sold** in retail stores
- **Innovative Asphalt Base Sealer** is recommended for use on driveways, parking lots, runways or any type of pavement surfaces where a fresh new look or rejuvenation is required

Directions for Use

Remove all loose material, dust, dirt and grease. If cleaning surface with water, allow to dry before sealing. Fill large cracks and patch holes with our high performance cold mix,

Apply **INNOVATIVE ASPHALT SEALER** with a spray bar. Depending on the age, porosity (has the surface been sealed previously), rate of application and temperature of the surface area, the coverage is between 75 and 150 sq ft per gallon. Normally only one coat is required, but if desired, two coats may be applied for increased longevity, only after the first coat has completely cured.

Surface is usually dry to the touch in approximately 9 hours, but 24 hours should be allowed for a full cure.
